BUSINESS & SALES SKILLS

- Project Management & Agile Methodologies
- CRM proficiency (e.g., Salesforce, HubSpot)
- Sales Strategy & Client Acquisition
- Team Leadership & Mentoring
- Public Speaking & Presentation
- Negotiations in a Business Environment
- Customer/User Behaviour mapping
- Trend Spotting
- Cross-cultural Communication (English/German)

PROFILE SUMMARY

"Exceptionally well-positioned for high-impact sales roles in tech" with 4+ years of technical fluency and 8+ years in sales and business development. Unique combination of technical expertise with a proven track record of driving revenue growth and solving complex technical challenges for enterprise clients. This duality positions me as someone who doesn't just build platforms—I also understand how to monetize them, sell them, and communicate their value at every level.

Key Strengths:

- Full-stack development with modern JavaScript frameworks and cloud architecture
- Technical instruction and mentoring (80+ sales professionals, 14+ developers trained)
- Enterprise client relationship management and revenue optimisation
- Cross-functional problem-solving in high-growth environments
- Revenue generation and client relationship management

EXPERIENCE

Poduca - London (Remote)

Sep 2024 - Present

A seed-stage startup that equips podcasters with all the essential tools, harnessing AI to streamline the process from initial idea to published podcast—all within a single platform. I took on the redesign and development of their website, emphasised additional revenue streams that had previously been overlooked, revamped critical features of their podcasting platform, and collaborated with a team of freelance developers to build the platform. As a startup with a background in business development, I frequently provided guidance on the steps necessary to meet the company's primary objectives.

Lead Engineer

Early-stage startup focused on innovative platform development

- **Technical Leadership:** Architected and developed core platform features using React/Node.js and Python Django Rest Framework.
- **Product Development:** Led the design process for AI features, including feasibility analysis.
- **Process Optimisation:** Created automated tools that enhanced producers' efficiency, reducing the time required to complete podcasts.
- **Business Impact:** Worked closely with the CEO and investors to ensure alignment between the technical roadmap and business goals.
- **Stakeholder Management:** Acted as a liaison between technical and business teams, translating complex requirements into actionable development tasks.

DCI Academy - Berlin(Remote)

Aug.2023-Aug.2024

Digital Career Institutes is dedicated to enhancing Germany's technical workforce by providing training in Web Development, Cloud Computing, and Software Development according to industry best practices.

Python Educator

- **Curriculum Development:** Created and implemented comprehensive Python programming courses tailored for career changers.
- **Student Success:** Guided over 15 students over 12 months of a Python Programming course, achieving an impressive 88% completion rate.
- **Technical Concepts:** Instructed on modern development practices, including Object-Oriented Programming (OOP), functional programming, and cloud technologies.
- **Industry Preparation:** Equipped students for real-world development challenges with hands-on projects and detailed code reviews.

AWS Cloud Computing Student

Nov.2022-Mar.2023

Intensive cloud computing certification program

- **Cloud Architecture:** Mastered AWS core services and Well-Architected Framework principles
- **Programming Language:** Expanded on existing knowledge of Python
- **Practical Projects:** Implemented real-world cloud solutions for scalability and cost optimization
- **Certification:** Achieved AWS Cloud Practitioner certification
- **Collaboration:** Worked with industry professionals on complex technical challenges

Stealth (Freelancer Group) | Various Clients- Berlin Sep 2021-Jan 2023

Fullstack Developer

Independent contractor serving SME and e-commerce clients

- **Client Portfolio:** Successfully delivered 15+ projects, including e-commerce platforms and business applications
- **Technical Delivery:** Built responsive React applications with Node.js backends and integrated payment systems
- **UI/UX Design:** Created wireframes and prototypes using Figma, improving user engagement
- **Performance Optimisation:** Refactored legacy codebases and migrated applications to modern cloud platforms
- **Documentation:** Improved code maintainability through comprehensive technical documentation

ResearchGate GmbH - Berlin

Nov.2016 -May 2019

Researchgate connects over 25 million researchers globally, making up the worlds largest platform for researches to collaborate. My Progressive advancement through four strategic roles demonstrates expertise in sales development, digital marketing, recruitment technology, and senior client management

Senior Sales Marketing Exec

- **Leadership Achievement:** Promoted to senior executive role, managing high-value enterprise client portfolios and driving strategic revenue initiatives
- **Strategic Impact:** Developed and executed comprehensive marketing strategies that enhanced customer engagement and retention across key accounts
- **Partnership Development:** Established C-level partnerships with stakeholders, directly contributing to organisational growth and market expansion

PROJECTS

e-Invoiceonline.com - 2025

- <https://github.com/Jeremiah1582/ChatBot-GPT3>
- An invoicing platform that follows the new EU standards for e-invoicing.

Smart Lens tech - 2024

- https://github.com/Jeremiah1582/SMART_LEN_Z
- This software allows you to take a picture, identify the image and gives a price estimate

ZOE Healthcare Web Platform -2021

- <https://github.com/Jeremiah1582/zoiaapp2021>
- This was a fun team project. An appointment booking system for the general public where they can keep all of their medical records securely online
