Delhi, India - 110095

📞 +91-8700951924 ✉ saxena.lakshya0106@gmail.com 🌐 Lakshya Saxena 🐙 SaxenaLakshya

Summary

Results-driven **Computer Science** undergraduate with strong foundations in **Software Development**, **Web Technologies**, and **Artificial Intelligence**. Experienced in building full-stack applications and deploying scalable **machine learning** models. Recently certified in **Microsoft Azure AI Fundamentals (AI-900)**. I am dedicated to solving real-world problems through code and actively seeking opportunities to contribute to engineering teams and AI-focused projects.

Education

SRM Institute of Science and Technology, Delhi NCR

June 2023 – May 2027

B.Tech. Computer Science and Engineering with specialization in AI and ML

CGPA - 8.79

Work Experience

QuickGHY

New Delhi

AI Engineer Intern

January 2025 – February 2025

- Performed in-depth **feature engineering** and data preparation on trade-related datasets to improve the performance of a recommendation engine.
- Built and trained a content-based recommendation model using **Python**, **Scikit-learn**, **Pandas**, and **NumPy**.
- Collaborated on refining the model pipeline and optimizing input features, achieving an estimated accuracy of 80%.
- Contributed to meaningful insights through **exploratory data analysis** and model experimentation.

Projects

UX-Llama-1B: Domain-Specific LLM | *Machine Learning Engineer* 🐙

October 2025

- Built a domain-specific **Large Language Model (LLM)** by fine-tuning **LLaMA-3.2-1B** using **Hugging Face Transformers** and **LoRA** for parameter-efficient training.
- Created a custom training dataset by extracting and preprocessing UI/UX handbook content, followed by **synthetic instruction response generation** using **Mistral-7B**.
- Implemented an end-to-end **LLM fine-tuning pipeline** including data preprocessing, prompt engineering, supervised fine-tuning (SFT), and checkpoint management.
- Optimized training under limited compute using **Google Colab GPUs**, with scope for further improvements using high-performance cloud GPUs (A100/H100).

Overthinker's Haven | *Full-Stack Developer* 🐙

March 2025

- Built a **full-stack** thought-sharing platform with secure **user authentication**, personalized joke filtering, and global post feed.
- Engineered a secure user authentication system utilizing **Supabase** as the **PostgreSQL** backend and **Bcrypt** for password encryption; attained zero reported data breaches and enhanced data security.
- Designed a responsive User Interface with **Tailwind CSS** and rendered views using **EJS** for better performance and user experience.
- Integrated JokeAPI via **Axios** and added smart filtering based on user preferences to increase engagement.

Technical Skills

Programming Languages: Python • C++ • JavaScript • TypeScript • Java • C#

Frontend Development: React.js • HTML • CSS • Bootstrap • Tailwind • EJS • Figma

Backend Development: Node.js • Express.js • Next.js • REST APIs • Supabase • FastAPI

AI and ML Tools: Scikit-learn • TensorFlow • PyTorch • Seaborn • Azure AI (ML, CV, NLP, GenAI)

Databases: MySQL • PostgreSQL • MongoDB • Firebase

Cloud & Deployment: Azure • Render

Operating Systems: Windows • Linux

Developer Tools: Git • GitHub • Postman • VS Code • Jupyter Notebook • Google Colab
