EDUCATION

SRM Institute of Science and Technology (SRMIST)

Delhi NCR, India

Bachelor of Technology in Computer Science and Engineering (AI/ML Specialization)

Aug 2023 – May 2027

- Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems

EXPERIENCE

AI/ML Intern

June 2024 – July 2024

Edunet Foundation

Delhi, India

- Designed and implemented a deep learning-based plant disease detection model using Convolutional Neural Networks, achieving high accuracy in early disease identification for sustainable agricultural practices
- Performed extensive data preprocessing, feature engineering, and model optimization using TensorFlow and OpenCV
- Deployed ML models for real-time applications and collaborated on version control using Git, strengthening expertise in applied AI and computer vision for real-world impact

PROJECTS

Real-Time Face Recognition Attendance System | *Python, OpenCV, KNN, NumPy*

- Developed an automated attendance system using K-Nearest Neighbors algorithm for face classification with over 90% accuracy
- Implemented real-time face detection and recognition via webcam using OpenCV for image processing and feature extraction
- Designed automatic marking system that records attendance with timestamp, reducing manual effort by 100%

Fruit and Vegetable Classification Model | *TensorFlow, Keras, CNN, Python*

- Built and trained a Convolutional Neural Network for real-time classification of fruits and vegetables using custom dataset
- Achieved high classification accuracy through data augmentation techniques and hyperparameter tuning
- Collaborated with team members to optimize model architecture and improve inference speed for deployment

Library Management System | *Python, OOP, MongoDB, MySQL*

- Developed a console-based application using Object-Oriented Programming principles for efficient library operations management
- Implemented features including book search, issue/return tracking, and automated record updates with database integration
- Designed modular and scalable architecture ensuring code reusability and maintainability

TECHNICAL SKILLS

Programming Languages: Python, C++, C, SQL

Machine Learning & AI: TensorFlow, PyTorch, Keras, scikit-learn, OpenCV, Computer Vision, NLP, Deep Learning

Web & Tools: Streamlit, Git, Docker, Kubernetes, Plotly, Large Language Models (LLMs)

Databases: MySQL, MongoDB

Core Competencies: Data Structures & Algorithms, Model Optimization, Feature Engineering, Cloud Technologies, Problem Solving, Team Collaboration

CERTIFICATIONS & ACHIEVEMENTS

Supervised Machine Learning: Regression and Classification – Coursera (Stanford/DeepLearning.AI)

IBM Artificial Intelligence Fundamentals – IBM

IBM Getting Started with Enterprise Data Science – IBM

Programming for Everybody (Getting Started with Python) – University of Michigan

SQL Basic Certification – HackerRank

Active participant in coding competitions and hackathons, consistently seeking opportunities to enhance technical skills
